

## **Model 201 / 202 instructions 9/27/12**

- 1) Remove 2 stem sections from protective wrap.**
- 2) Carefully pull cord out of lower stem and base.**
- 3) Place cord through middle stem section then through upper stem.**
- 4) Align screw holes with power cord hole. Push together and tap top stem to FULLY seat pipe sections into connectors. Install #6 x 1/2" screws in lower and middle stem, but not in upper stem.**
- 5) Remove screw from head assembly. Attach the wires from head assembly to stem. Black to black & white to white. Place head on upper stem and push down firmly. Align switch opposite of the screws you installed in step 4 ( make sure you do not pinch the wires ) Install screw.**
- 6) Install light bulbs, 40 watt max. ( not included )**
- 7) Screw on globes. ( a little pledge or similar product on threads eases installation )**

**Lamp is now ready for use.**

**To clean use a soft cloth and soapy water or soft scrub.**
